

XLod Global

NEW YORK

24 September 2026

Javits Center, New York

Summary agenda

PLENARY PANELS

- **Q&A Plenary Discussion:** The Next Generation 3 Lines Model: What Stays, What Goes, What Changes?
- **Plenary Discussion:** The NFR Future According to CROs: Building the Risk Function of the Future

STREAMS

- Governance, Risk and Compliance (GRC)
- 3 Lines Operating Model
- Regulatory Compliance & Market Abuse
- NFR Innovation & Technology

KEYNOTE INTERVIEW:

Frank Abagnale

American author and financial security consultant, famous for his memoir 'Catch Me If You Can'.

xlodglobalnewyork.1lod.com

Target Agenda

This agenda is not public and is for the intended recipient only. These speakers are for illustration purposes only and unless indicated have not been and may not be invited.

Thursday 24 September Javitz Centre, 429 11th Ave, New York, NY 10001, United States	
07.30-08.20	VIP Breakfasts – By Invitation Only: Asset Management Compliance Leaders’ Network
	Asset Managers Compliance Leaders’ Network VIP Breakfast: Moderator: Roger Noon, Senior Moderator, XLoD Global
07.45-08.30	Registration, Coffee & Networking in Exhibition Area
	Opening Session
08.40-08.50	Welcome Address: Andrew Lennon , Director, XLoD Global
08.50-09.00	Keynote Address: Greg Ruppert , Chief Regulatory Officer, FINRA
09.00-09.10	Keynote Address:
09.10-10.00	Q&A Plenary Discussion: The Next Generation 3 Lines Model: What Stays, What Goes, What Changes?
	- Looking back over the past 3–5 years, how have banks and the financial industries’ interpretation and implementation of the 3 lines model evolved? - How will the 3 lines model need to evolve to manage emerging risks? - In your view, where do the boundaries blur most between the lines today, and is that a risk or an opportunity? - How well are the three lines currently collaborating in practice? What practical barriers still exist to achieving a truly integrated risk and control environment? - What role is technology playing in redefining responsibilities and interactions between the lines? Have you seen success (or failure) in automating or centralising risk & control functions? - If you could redesign the 3 lines model from scratch — free from legacy structures - what would you keep, and what would you do differently?

	Moderator: Panellist: Mary McNiff , Chief Operating Officer, Banking & International, Citigroup Charles Smith , Chief Risk Officer, Morgan Stanley Yvette Hollingsworth Clark , Executive Vice President and Chief Compliance Officer, State Street Paul Ricci , Senior EVP, Chief Auditor, Internal Audit, Wells Fargo				
10.00-10.30	Coffee & Networking in the Exhibition Area sponsored by 				
10.30-11.10	Interactive Roundtable Discussions: Small group debate specific subjects. Delegates must select the discussion they wish to join prior to the Summit.				
	Does a Control Utopia exist?	Are RCSAs inherently backward-looking or can they deliver real value?	Right sizing the 3 Lines without adding risk	Horizon scanning for modern risks across the 3 lines	Boardroom Discussion: Effective Use Cases for Artificial Intelligence across the 3 Lines of Defence - What are the successful use cases in AI that firms have implemented across the 3 lines of defence? - What is holding firms back from more widespread adoption of AI? What steps can firms take to overcome this? - Is AI the silver bullet, or are there more strategic opportunities which will enact more meaningful change across risk & control functions? - What are the ethical and operational considerations when deploying AI solutions in non-financial risk management, and how can these be addressed to gain explainability and
	Discussion Facilitator: Chris Bucchino , Executive Director, Corporate and Investment Banking Control, Wells Fargo Mike Russo , Director, Business Risk & Control, Mizuho	Discussion Facilitator: Vassiliki Siabanis , Head of Risk and Controls, Treasury, Citigroup	Discussion Facilitator:	Discussion Facilitator: Edward Martynowicz , Managing Director, Head of Business Risk & Controls, Mizuho	
	Ensuring effective calibration of trade surveillance	Building real-time technological capabilities for continuous surveillance	Ensuring success with AI in the future of surveillance	Voice surveillance in a multilingual multi-jurisdictional world	
	Discussion Facilitator:	Discussion Facilitator: Haley Mitchell , Executive Director, Head of Global Surveillance, Wells Fargo	Discussion Facilitator:	Discussion Facilitator:	

L&D Global New York 2026					
	Achieving holistic surveillance: Realistic goal or expensive fantasy?	Navigating the changing global regulatory environment across the 3LoD	Making the compliance function a true partner to the business	Ensuring global harmonisation of NFR frameworks	defensibility to regulators and stakeholders? Moderator: Panellist: Alexander Aronov , Managing Director, AI Compliance and Data Intelligence, Citigroup Christine Bell , Managing Director, Risk Technology, JPMorgan Chase Nikhil Singhvi , Managing Director - Risk Technology, UBS Jitendra Joshi , Managing Director and Americas Head of Technology for Compliance, Societe Generale
	Discussion Facilitator: Lore Aguilar , Head of Surveillance and Employee Compliance Data Science, Citigroup	Discussion Facilitator:	Discussion Facilitator: Jin Yun , Director, First Line of Defence, Fifth Third Spruille Braden , Managing Director, Head of Operational Resilience, PGIM	Discussion Facilitator:	
	Deploying AI for the next gen of GRC intelligence	Moving beyond silos for holistic risk management	What is left to do on risk culture?	Managing Non-Financial Risk in a Volatile US Landscape	
	Discussion Facilitator: Evan Wheeler , Senior Director, Technology Risk Management, Capital One Michael Gandara , Global Technology Head of Governance, Risk and Compliance, JPMorgan Chase	Discussion Facilitator: Xiaoxi Lu , Director, Strategy, Risk, Governance and Execution, Deutsche Bank	Discussion Facilitator: :	Discussion Facilitator:	
	Dealing with evolving cyber threats in 2026 and beyond	Ensuring seamless data completeness and capture across the organisation	Is AI Really a Silver Bullet for the 3 Lines?	Building the IA function of the future	
	Discussion Facilitator:	Discussion Facilitator: Devangi Chopra , Executive Director, CIB Controls, Wells Fargo Securities	Discussion Facilitator: Anthony Sinatra , Executive Director, Risk and Compliance, Morgan Stanley	Discussion Facilitator:	
	Governance, Risk and Compliance (GRC)	3 Lines Operating Model	Regulatory Compliance & Market Abuse	NFR Innovation & Technology	
11.15-11.25	Keynote Address:	Keynote Address:	Keynote Address:	Keynote Address:	

11.25-11.35	Keynote Address:	Keynote Address:	Keynote Address:	Keynote Address:
11.35-12.15	Boardroom Debate: The New Regulatory Reality: Interpreting and Implementing Evolving US Expectations on NFR - Are banks seeing a shift in the supervisory approach to non-financial risk from US regulators, or simply a re-emphasis of long-standing expectations? - How should firms interpret the latest supervisory guidance on non-financial risk, and which elements represent a meaningful change in regulatory standards? - To what extent are firms adapting their non-financial risk frameworks in response to changing regulatory expectations? - What proactive steps should firms be taking now to stay ahead of supervisory expectations, particularly in areas such as operational resilience, operational risk, third-party risk, technology risk, etc? Moderator: Panellist: Rique Feaster, Managing Director, Swap Dealer Compliance, Goldman Sachs Kashyap Bhatia, Managing Director, Head of Global Markets Compliance and Operational Risk, Bank of America Julie Walsh, Executive Vice President and Chief Compliance Officer, Scotiabank Christine Calarco, Managing Director, Interim Chief Compliance Officer, US, HSBC	Panel Discussion: What Does a Strong 1st Line of Defence Look Like in Practice? - Management of non-financial risk within the 1st line has evolved from a controls assurance function, to the chief controls office, to management of non-financial risk. What does the future of the function look like and what role will technology and data play? - Does the controls office have the necessary capabilities to manage evolving demands? What new skills, capabilities, and frameworks will the controls office need as risk assessments, control testing, and issue identification become more automated and data-driven? - What gaps still remain in the 1st line, and how can these be overcome to ensure efficiency and effectiveness? - As firms continue to rationalise and automate controls, how should banks determine what can be simplified or removed? Moderator: Panellist: Farhan Amin, Managing Director, Head of Strategic Initiatives Group, CIB Control, Wells Fargo Noemi Zibuts, Managing Director, Head of Governance and Controls, Markets, Citigroup Chuan Wong, Managing Director, Global Markets Chief Control Office, BNY	Q&A Panel Discussion: What does the Future of Surveillance Look like Tomorrow? - What macro trends in global regulation are reshaping expectations around surveillance, and how can firms position their programs to anticipate rather than react to supervisory focus? - AI is not new to surveillance. What will the future operating model for surveillance look like? And what role does technology play in achieving this future state? - What foundational shifts must firms embed today to ensure their surveillance model remains resilient in the face of future uncertainty? - What are the key areas of regulatory enforcement that banks should be prioritising in their surveillance functions? How can banks address challenges such as data governance, technology limitations, and evolving compliance expectations? Moderator: John Malitzis, Former Managing Director, Global Head of Surveillance, TD Securities & Senior Moderator, XLoD Global Panellists: Niki Fotheringham, Managing Director, Global Head of Surveillance, Bank of America	Panel Discussion: Confronting the Realities of Digital Asset Risk - Are existing governance frameworks, technologies and controls appropriate for the challenges posed by digital assets? - How should financial institutions monitor political developments at international, national, and local levels to anticipate and adapt to shifts in regulatory policy for digital assets? - How can financial institutions balance regulatory compliance with the core principles of decentralisation and anonymity that underpin digital assets? - How can banks navigate the fragmented regulatory landscape in order to establish a golden standard for digital asset risk frameworks? - What role should senior management play in proactively setting a strategy and defining the risk appetite for offering digital asset products and services, and how can they effectively assess the risks inherent in emerging business models? Moderator: Panellists: Rajeev Bamra, Associate Managing Director, Head of Strategy, Digital Economy, Moody's Ratings Sam ten Cate, Managing Director, Technology, State Street CJ Rinaldi, Chief Compliance Officer, Kraken

		Cida Goncalves , Managing Director, Chief Controls Officer for The Americas, Investment Bank And IHC, Barclays	Andrew Pfaff , Managing Director, Global Head of Surveillance, Employee Compliance, Licensing, Citigroup Damien Firsching , Managing Director, Global Head of Surveillance, TD Securities

12.35-13.30	Lunch & Networking in the Exhibition Area			
12.40-13.30	VIP Lunches – By Invitation Only: XLoD Leaders’ Network & Surveillance Leaders’ Network			
	XLoD Leaders’ Network VIP Lunch: Using AI to Prevent Loss, Improve Process and Driving Decision Making Moderator:		Surveillance Leaders’ Network VIP Lunch: What Needs Greater Evolution: Comms or Trade Surveillance? Moderator: Mark Carawan, Former Chief Compliance Officer, Citigroup & Senior Moderator, XLoD Global	
	Governance, Risk and Compliance (GRC)	3 Lines Operating Model	Regulatory Compliance & Market Abuse	NFR Innovation & Technology
13.30-13.40	Keynote Address:	Keynote Address:	Keynote Address:	Keynote Address:
13.40-14.20	Panel Discussion: Rethinking Best Practice for Cyber, Third Party & Operational Resilience Management	Panel Discussion: 3LoD 2.0: Redesigning Risk & Controls for a New Era	Panel Discussion: Why Banks Should Give a S*** about Swearing in Surveillance	Boardroom Debate: Garbage In, Enforcement Out: Why Data Quality Is the Real Non-Financial Risk
	With initial regulatory deadlines now behind banks in the Europe, how should firms shift from regulatory compliance to true operational resilience embedding? And what does “resilience by design”	- How can firms harmonise controls and redesign the processes to increase coverage, efficiency and effectiveness? - Does there need to be a regulatory imperative to drive control	Does the presence of profanity or emotional language in monitored communications meaningfully correlate with heightened market-abuse or misconduct risk, or is it	How often are firms still discovering that poor data quality, rather than process or people, sits at the heart of major risk incidents, audit findings or supervisory criticism?

	look like in practice over the next two years? - Given the increasing focus on cyber and third-party risks, how should organisations rethink their approach to supply-chain resilience? - How can banks demonstrate a clear return on investment in operational resilience in order to justify greater resources for mitigating disruptions and outages? - With high-profile outages and human-driven vulnerabilities still occurring, how should firms evolve their testing, training, and scenario exercises to ensure their operating environments remain robust under stress? - Looking ahead, what emerging capabilities will be most transformational for resilience, and which should firms prioritise now? Moderator: Panelist: Julia Miller, Managing Director, 1st Line Operational Risk & Resilience, BMO Cyril Korenbusser, Managing Director, Head of Operational Resilience, Mizuho Mandar Rege, Senior Managing Director / Senior Vice President - Technology, Cybersecurity and Resilience, State Street JJ Juergensen, Managing Director, Head Technology Controls, BNY (Pending Approval)	digitisation? And do ‘run the bank, change the bank’ resourcing conflicts lessen the desire to adopt further digitisation? - How are firms implementing advanced technology solutions that allow for ongoing risk monitoring in a BAU state? - To what extent has the adaption of legacy taxonomies to reflect today’s operational risk environment affected processes and control procedures? Moderator: Panelist: Dan Devroye, Managing Director, Head of Control, Strategy and Innovation, Global Security, JPMorgan Chase Jim Monagle, Americas Head of Non-financial Risk, Markets and Securities Services, HSBC Ine Lolomari, Managing Director - Head Capital Markets Operational Non-Financial Risk, BMO Sabeena Ahmed Liconte, Head of Legal & Chief Compliance Officer, Americas, ICBC Standard Bank Group Gladys Griffiths, Senior Vice President, Co-Deputy Head of Audit, State Street	just noise creating additional unnecessary alerts? - How should banks balance the need to capture “risky” communications against the operational burden of tuning alert models and reducing false positives? - Can linguistic patterns, tone, sentiment, or behavioural shifts in conversations act as credible early-warning indicators of potential misconduct—beyond traditional keyword-based surveillance? - With the expansion of omnichannel communications, what level of coverage is actually necessary to detect risky behaviour, and where does swearing sit in the hierarchy of linguistic risk signals? - Given advancements in NLP and behavioural analytics, should surveillance teams move away from simple keyword triggers and toward context-driven behavioural models that understand why a person is swearing rather than whether they are? Moderator: Panelist: Anthony Karoleski, Managing Director, Head of Americas Communications Surveillance, SMBC Joseph Campione, Managing Director Global Head of Communications Surveillance CIB and CB, Wells Fargo Ivan Gerstein, Managing Director, Capital Markets Supervision, BMO Capital Markets	- Where do the biggest data integrity failures typically occur: sourcing, lineage, ownership, validation, or change management? Why are these issues so persistent? - How can firms build practical, scalable data governance frameworks that actually work in day-to-day operations rather than becoming theoretical, documentation-heavy exercises? - What tools, technologies or operating models are proving most effective in improving data accuracy and transparency? Are firms leveraging automation, AI and metadata management? - To what extent do cultural issues, such as lack of ownership, unclear accountability, or resistance to change, impede meaningful progress on data quality, and how can organisations shift this mindset? Moderator: Panelist: Alan Kaplan, Managing Director, Head of Model Risk Management, Citigroup Clement King, Managing Director, US Head of Business Unit Risk Management, Scotiabank Asis Mohanty, Managing Director, Global Head, Compliance and Supervision Technology, TD Rachel Sendrovic Feuer, Managing Director, US Head of Model Risk
--	--	--	---	--

	Jason Conn, Managing Director, Head of Operational Risk and Business Continuity & Resiliency, DTCC			Management and Global Head of Model Risk Controls, Barclays
	Governance, Risk and Compliance (GRC)	3 Lines Operating Model	Regulatory Compliance & Market Abuse	NFR Innovation & Technology
14.25-15.05	Panel Discussion: Breaking the Silos — Managing the Interconnectedness of Financial and Non-Financial Risks	Boardroom Debate: Rethinking Control Testing as a Strategic Enabler	Panel Discussion: Tackling the Challenges of Modern Trade Surveillance	Panel Discussion: Understanding Effective Regulatory Change Management
	- How can banks break down silos between financial and non-financial risk teams to reflect the growing convergence of risks? - What role should the 2nd line play in ensuring risk interdependencies are mapped, monitored, and escalated effectively across organisations? - How can integrated risk frameworks adapt to emerging threats like AI-driven fraud, climate stress, and geopolitical instability without becoming overly complex? - How are firms evolving risk appetite statements and control testing to better capture interconnected risks such as third-party concentration or tech outages? - How are banks leveraging scenario testing, data and tech to gain a more holistic, real-time view of risk interdependencies across financial and non-financial domains? Moderator: Panellist: Brian Slackman, Managing Director, Head of Business Controls – Americas, MUFG	- What is more important: control design or effective control testing? - What role should the 1st Line play in control testing and assurance — and how is the 1st line taking ownership of testing, assessment, and improve the effectiveness of controls? - How are you prioritising which controls to test in an increasingly complex control environment? Are you still relying on cyclical sampling, or shifting towards more real-time or risk-based testing approaches? - What role have automation and AI played in evolving your approach to control testing and assurance — and how have they influenced the efficiency, coverage, and reliability of your testing activities? - How confident are you that control failures are being detected early enough to prevent material harm? What indicators or assurance mechanisms do you rely on to validate that controls are operating effectively? - Looking ahead, what's required to elevate control testing to a genuine strategic advantage — and what is	- How are evolving regulatory expectations shifting the focus of trade surveillance processes and controls? - What are the biggest challenges firms face when replacing legacy trade surveillance systems, and how can they ensure newer platforms remain adaptable to changing market dynamics? - How can firms improve data governance to ensure their trade surveillance systems receive accurate, timely, and complete data across all trading venues and asset classes? - To what extent can AI and automation improve the efficiency and effectiveness of trade surveillance without diminishing the role of human expertise? - How can firms adapt their trade surveillance frameworks to identify emerging risks from cross product manipulation and OTC markets? Moderator:	- How can organisations effectively align their risk appetite with the changing regulatory environment? What challenges do they face in maintaining this alignment amid global regulatory developments? - How financial institutions ensure a seamless mapping of regulations to policies, procedures, controls, and KRIs to maintain compliance? - In light of frequent and complex regulatory changes, how does your organisation stay agile and ensure that new requirements are effectively communicated and implemented across global operations? - What strategies or technologies have you adopted to proactively identify and address gaps in compliance when faced with rapidly evolving regulatory landscapes? Moderator: Panellist: Ian Montgomery, Managing Director, Head, Regulatory Engagement & Advocacy Americas, Standard Chartered Bank Alex Radetsky, Managing Director, Head of Regulatory Affairs, US, Natixis

	Andre Caraballo , Managing Director - Operational Risk, Macquarie Katherine Stowe , Managing Director, Head of Enterprise Non-Financial Risk Programs, Morgan Stanley Jon Rasmussen , Managing Director, Chief Compliance Officer, TD Bank U.S	the role of the 3 lines in ensuring effective control testing? Moderator: Panellist: Anna Walters , Managing Director, Head of Conduct and Control, Americas, Standard Chartered Bank Jo Hubbard , Managing Director, Global Head of Equities Risk and Control, Citigroup Bill Colacicco , Managing Director, Global Markets & Treasury NFRC ex-Japan, MUFG	Panellist: Patricia Flynn , Managing Director, Global Head of Market Surveillance, State Street Stephen Ditranto , Managing Director, Global Head of Capital Markets Surveillance, RBC Capital Markets Colin Telmer , Managing Director, Global Head of Trade Surveillance, Scotiabank Nikhil Awasthi , Managing Director & Global Head of Institutional Trade Monitoring, Regulatory Reporting, Supervisory Controls Technology, Morgan Stanley	Paul Walsh , US Chief Compliance Officer & Head of Regulatory Risk, Americas, Commonwealth Bank of Australia Curtis Kloepper , Managing Director - Head of Regulatory Affairs, Americas, Societe Generale Bruce Spiegler , Managing Director, Head of Regulatory Affairs, Jefferies LLC
